

Avishan - Fehler #1203

Outline error in input files

15.04.2025 09:15 - Birte Reich

Status:	Erledigt	Beginn:	15.04.2025
Priorität:	Normal	Abgabedatum:	
Zugewiesen an:	Avishan Sharafi	% erledigt:	0%
Kategorie:		Geschätzter Aufwand:	0.00 Stunde
Zielversion:		Aufgewendete Zeit:	0.00 Stunde
Beschreibung example: https://moodle.math.uni-paderborn.de/mod/forum/view.php?id=562 should be wrong in every intro file the problem is that if you open the outline on the left, there are some labels below the topics (e.g. label3067) and we don't want to have them there Probably the problem is in one of the files in git -> studifinder -> input -> files_vemint because they are there for the short versions			

Historie

#1 - 15.04.2025 09:20 - Birte Reich

Search in google or chatGPT if anyone had the same issues with the label
maybe moodle needs us to give a label

#2 - 15.04.2025 09:24 - Birte Reich

find out why moodle makes those labels so that we might be able to fix it
if therre is no easy solution it is fine as well

Maybe one of those websites might be helpful, there should be more in english as well
<https://tracker.moodle.org/browse/MDL-81925?jql=project%20%3D%20MDL%20AND%20component%20%3D%20%22Maths%20filters%22>
<https://moodle.org/mod/forum/view.php?id=8736>

#3 - 15.04.2025 09:25 - Birte Reich

this is the old moodle and how is should look in the new one hopefully soon as well

Outline Lable problem has solved.
Proof of content is attached.

#5 - 21.04.2025 11:34 - Avishan Sharafi

I replaced the labels with appropriate titles .
For example, label2043 with title (Einführung zur Formeleingabe) is replaced.

#6 - 25.04.2025 09:13 - Birte Reich

Maybe there is anything in site administration which let us ignore all the labels (so that there is really nothing to see if that is possible)

Here is a link to a site in the old moodle where you can see what I mean: <https://mdl.math.uni-paderborn.de/course/view.php?id=68§ion=3>

#7 - 28.04.2025 11:34 - Avishan Sharafi

- 1. The New Moodle structure is different from the old one; it does not let the "Title in the course index" remain black. If we leave the title blank, it falls back to the internal resource name.

Easy Solution :

Make the "Title in course index" invisible by entering a simple character such as a **dot (.)** or a **dash (-)** .

This way, the label remains technically present but appears almost invisible in the course index, avoiding any strange text or long technical names.

Difficult Solution :

Go to the main section title (for example, "Potenzen") and move the entire content that was previously inside the "Text" field of the label (associated with the " **Title in course index** ") into the " **Description** " field of the main section itself (e.g., "Potenzen").

This ensures that the content appears directly under the section title without creating an extra label entry in the course index.
